

*my goals,
my schedule,
... and my life!*

Instruction that fits . . .

Living outside of the Indianapolis area, enroll in On-line instruction!

"Dear Japanese Students,
In the simplest of terms, online lessons fit my budget, schedule and transportation needs.

I chose the professional instruction from the KC classroom because the program's focus was not divided. They aren't trying to be a one-stop learning center for multiple languages. My instructor spends everyday teaching Japanese to students of all ages. He is welcoming and supportive of my goals. He knows how to help me because of seasoned experience.

After a few weeks I came to realize that I cannot learn Japanese acting like a consumer--as if I'm buying a product. Japanese are unique peoples that have evolved from beautiful, historic traditions so engrained in their society that I could never learn important customs from a computer software program. I needed to experience it and I do at Kanji Camp.

The disciplined KC system is teaching me Japanese language as well as social etiquette that has helped me at work with my Japanese coworkers. The more I open myself up to learning foreign communication strategies, the more progress I find myself making at work.

If you're serious about Japanese, then I recommend you to contact or email the KC program. They offer crash courses for business trips as well as long-term programming. I'm glad I did!"
